SD CARD REPAIR

If you are not comfortable using the command line, you can always use a simple, built in Windows OS tool for checking and repairing SD card
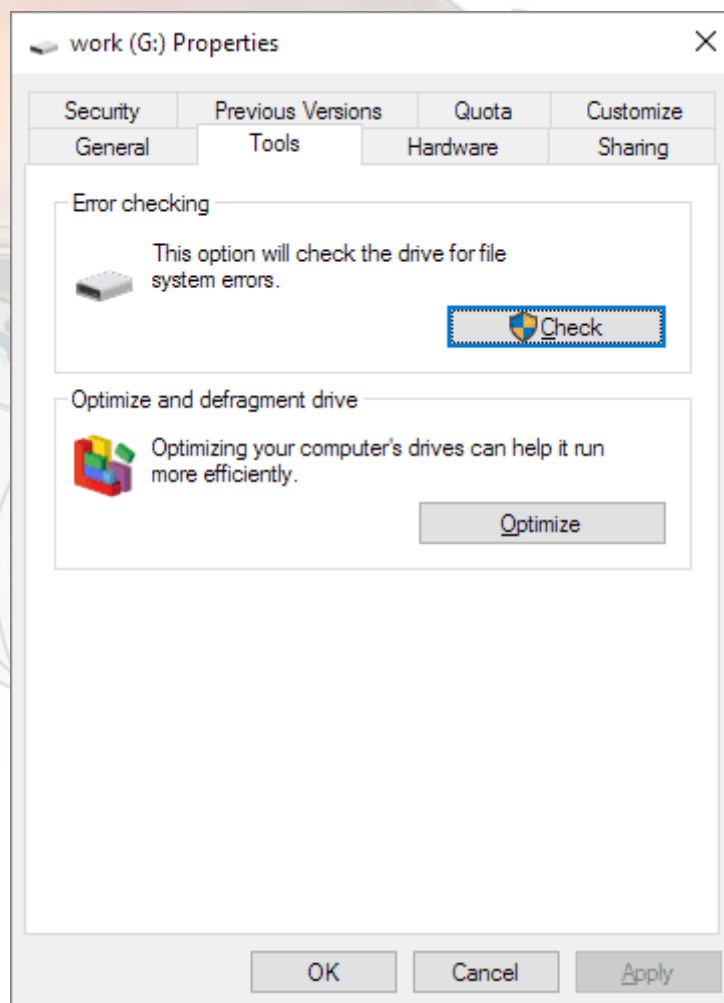

STEP 1: connect SD card to PC with Windows OS
STEP 2: go to My Computer and select your SD card
STEP 3: make right-click and select PROPERTIES from the list
STEP 4: go to TOOLS tab
STEP 5: press CHECK

STEP 6: Allow the scanning process to complete and close the window scan window.
STEP 7: Make right-click on the USB flash drive icon and select "Eject". Then remove the SD card.
